## PROFESSIONAL SUMMARY

---

I have completed MCA under Cochin University of Science and Technology. I am specializing in Machine Learning and Artificial Intelligence, with hands-on experience developing end-to-end ML applications using Python, Scikit-learn, TensorFlow, and XGBoost. Experienced in data preprocessing, feature engineering, model training, evaluation, and FastAPI-based prediction APIs. Developed a federated credit-card default prediction system and interested in building scalable ML solutions for real-world business problems.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, JavaScript, TypeScript, SQL

**Machine Learning** Scikit-learn, Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Predictive Modeling, Feature Engineering, Model Training, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Ensemble Learning

**ML Algorithms:** Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, K-Means Clustering

**Deep Learning & Computer Vision:** Artificial Neural Networks, CNNs, Transfer Learning, YOLO, Object Detection, Semantic Segmentation, U-Net, Face Recognition, Siamese Networks, Triplet Loss

**ML Engineering & Deployment:** FastAPI, Docker, REST APIs, Model Deployment, Model Inference, Federated Learning, Model Aggregation

**Data Science:** NumPy, Pandas, Matplotlib, Data Preprocessing, Data Visualization

**Backend Development:** Flask, Django, Node.js, Express.js, JWT Authentication

**Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS, TypeScript

**Databases:** PostgreSQL, MySQL, Supabase, Prisma ORM

**Tools & Technologies:** Git, GitHub, Postman, Jupyter Notebook, VS Code, Linux

## PROFESSIONAL EXPERIENCE

---

### FULL STACK DEVELOPER INTERN

Inker Robotic Solutions Pvt. Ltd. | Feb 2026 – May 2026

- Developed a Multi-Tenant WhatsApp Ticket Booking SaaS, boosting booking efficiency by 30%.
- Reduced admin complexity by 20% through automated workflows and role-based dashboards.
- Integrated QR ticketing, payment workflows, and optimized database design for seamless multi-tenant operations.
- Contributed to BRD/SRS documentation, testing, and deployment in Agile teams.

### AI, ML & DATA SCIENCE TRAINER

Inker Skill Fest Program

- Delivered AI, ML, and Data Science training with hands-on projects, enhancing participant skills.

## CERTIFICATIONS & COURSES

---

- Machine Learning Specialization | DeepLearning.AI & Stanford | Coursera | 2026
- Deep Learning Specialization | DeepLearning.AI | Coursera | 2026
- Python DSA + LeetCode | Udemy | 2026
- JavaScript Algorithms & Data Structures | Udemy | 2026
- Full-Stack Web Development | Udemy | 2025
- Introduction to IoT — Elite | NPTEL | 2025

## TECHNICAL PROJECTS

---

### Federated Credit Card Default Prediction System

**Technologies:** Python, FastAPI, Scikit-learn, TensorFlow/Keras, XGBoost, PostgreSQL

- Developed a federated machine learning system for credit-card default prediction using simulated data from multiple bank branches, focusing on privacy-preserving model training.
- Compared Logistic Regression, Random Forest, XGBoost, and Neural Networks using feature engineering, model evaluation, and federated model aggregation; achieved approximately 0.78 ROC-AUC.

### Multi-Tenant WhatsApp Ticket Booking SaaS

**Technologies:** React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Supabase, Prisma ORM

- Developed a multi-tenant ticket-booking platform integrating WhatsApp Cloud API, Razorpay, QR ticket generation, and automated booking workflows.
- Implemented role-based dashboards, seat management, QR-based ticket validation, and refund processing using a PostgreSQL-based architecture.

### Invoice-PO Comparison Automation

**Technologies:** React.js, Node.js, OCR, AI

- Developed an AI-powered document-processing system that extracts and compares invoice and purchase-order data using OCR.
- Implemented document validation, automated report generation, REST APIs, and a dashboard for uploading documents and reviewing comparison results.
