Portfolio: my-portfolio-blue-one-83.vercel.app

EDUCATION

College of Engineering Thalassery Master of Computer Applications	Thalassery, Kannur Pursing
SNG College of Advanced studies Bachelor of Computer Applications	Thottada, Kannur 2021-2024
Rajeev Gandhi Memorial Higher Secondary School Computer Science	Mokeri, Kannur 2019-2021

PROFESSIONAL SUMMARY

MCA Final Year student specializing in Machine Learning and Artificial Intelligence with hands-on experience in developing production-ready ML applications using Python, Scikit-learn, TensorFlow, XGBoost and FastAPI. Completed the Machine Learning Specialization by DeepLearning.AI & Stanford University and built end-to-end machine learning systems involving feature engineering, model training, federated learning, neural networks and REST API deployment. Strong foundation in data preprocessing, model evaluation, ensemble learning and AI-powered backend development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++

Machine Learning & AI: Scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, Neural Networks, Feature Engineering, Model Evaluation, Cross-Validation, Supervised Learning, Unsupervised Learning, Reinforcement Learning

Data Science: NumPy, Pandas, Matplotlib, Data Preprocessing, Data Visualization

Backend Development: FastAPI, Flask, Django, Node.js, Express.js, REST APIs, JWT Authentication

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, TypeScript

Databases: PostgreSQL, MySQL, Supabase, Prisma ORM

Tools & Technologies: Git, GitHub, Postman, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER INTERN

Inker Robotic Solutions Pvt. Ltd. | Feb 2026 – May 2026

- Developed a Multi-Tenant WhatsApp Ticket Booking SaaS, boosting booking efficiency by 30%.
- Reduced admin complexity by 20% through automated workflows and role-based dashboards.
- Integrated QR ticketing, payment workflows, and optimized database design for seamless multi-tenant operations.
- Contributed to BRD/SRS documentation, testing, and deployment in Agile teams.

AI, ML & DATA SCIENCE TRAINER

Inker Skill Fest Program

- Delivered AI, ML, and Data Science training with hands-on projects, enhancing participant skills.

CERTIFICATIONS & COURSES

- Machine Learning Specialization – DeepLearning.AI & Stanford University | Coursera | 2026

Topics: Supervised Learning, Neural Networks, Decision Trees, Unsupervised Learning, Clustering, Recommender Systems, Reinforcement Learning

- Python Data Structures & Algorithms + LeetCode Exercises | Udemy | 2026
- JavaScript Algorithms and Data Structures Masterclass | Udemy | 2026
- The Complete Full-Stack Web Development Bootcamp | Udemy | 2025
- Introduction to Internet of Things (Elite Certificate) | NPTEL | 2025

TECHNICAL PROJECTS

Federated Credit Card Default Prediction System

Technologies: Python, FastAPI, Scikit-learn, TensorFlow/Keras, XGBoost, PostgreSQL

- Developed a production-style federated learning system for privacy-preserving credit default prediction across multiple simulated bank branches.
- Built and evaluated Logistic Regression, Random Forest, XGBoost, and Neural Network models using feature engineering and ensemble learning techniques.
- Developed FastAPI-based prediction APIs with role-based authentication, achieving approximately 0.78 ROC-AUC through federated model aggregation.

Multi-Tenant WhatsApp Ticket Booking SaaS

Technologies: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Supabase, Prisma ORM

- Developed a multi-tenant SaaS platform for WhatsApp-based ticket booking with QR ticket generation and secure payment integration.
- Implemented role-based dashboards, seat management, booking workflows, and automated refund processing using a scalable database architecture.
- Integrated WhatsApp Cloud API, Razorpay, and QR-based ticket validation to streamline end-to-end event management.

Invoice-PO Comparison Automation

Technologies: React.js, Node.js, OCR, AI

- Developed an AI-powered document processing system for automated invoice and purchase order comparison using OCR.
- Implemented intelligent text extraction, document validation, and automated report generation to reduce manual verification effort.
- Built REST APIs and a responsive dashboard for document upload, comparison, and result visualization.
